Zmaj razkriva svoje novo pivo, ki je ustvarjeno za vroče poletne mesece. Hoppy lager preseneti s svojo svežino, pitnostjo in nežno hmeljno aromo. Lahko bi ga označili kot mlajšega brata naših mogočnih IP, vendar za razliko od IPE ima lager manj grenčice. Hmelj Cascade doda pivu unikatno aromo cvetlice, začimbnic in citrusov, kar pa ga bistveno razlikuje od ostalih lager piv.

The dragon unveils its new beer created for the hot summer months. Hoppy Lager is surprisingly fresh, drinkable and offers a tender hoppy aroma. You could call it our mighty IPA's younger brother, albeit slightly less bitter. The Cascade hop variety provides for a unique aroma combining flowers, spices and citruses, making it quite different from your typical lager.

Ali sploh lahko zvarimo pivo z 0,0% alkohola in odličnega okusa? Naši pivovarski mojstri so začeli iz nič in porabili več let za raziskovanje, varjenje in okušanje, preden so ustvarili recept, ki ga zaznamujeta njegova osvežujoča in sadna nota ter mehak, sladen okus - v popolnem ravnovesju. Torej pivo, ki si zasluži Heinekenov znak. Seveda tudi to pivo zaznamujejo brezkompromisne značilnosti, ki pivo Heineken spremljajo že od leta 1873 - naraven okus in sestavine ter edinstvene kvasovke A-Yeast. Ni bilo enostavno, nikakor pa ne nemogoče.

Is it even possible to brew a great tasting 0.0% alcohol lager beer? Our master brewers started from scratch and spent years exploring, brewing, and tasting before they finally created a recipe defined by its refreshing fruity notes and soft malty body – perfectly balanced. One that deserves the Heineken mark. Of course, it also has all the uncompromising characteristics that have defined Heineken since 1873: natural flavour and ingredients, as well as Heineken's unique A-Yeast. It wasn't easy, but not impossible.

Prvič smo ga zvarili v zlatih časih 1958 in od takrat Golding ostaja ultimativna legenda med slovenskimi lager pivi. Odličnost mu daje Savinjski golding, tradicionalna slovenska sorta hmelja, ekotip angleške sorte Fuggle, ki je šele v klimi Slovenije razvil svojo edinstvenost in dragocenost. Je svetovno znan po svoji fini hmeljni aromi ter prijetni in harmonični grenčici, ki daje pivu opojen sladkobno meden okus.

Laško GOLDING was first brewed in the golden year of 1958, and has remained the ultimate legend among Slovenian lagers ever since. Its excellence originates from the use of Savinjski Golding, a traditional Slovenian hop variety – an ecotype of the English Fuggle variety, which has only developed its uniqueness and character in the Slovenian climate. The beer is globally known for its fine hoppy aroma and pleasant and harmonious bitterness that gives the beer its sweet honey-like taste.
